

THERMOPLASTIC 2K INJECTED SEAL

Our patented Thermoplastic 2K Injected Seal is an original weatherstrip solution. Unlike standard sealing solutions, it's available in a wide range of complex shapes and its color can be selected to match other parts on the vehicle. Our seals provide lightweight & enhanced aspect solutions for water management and acoustic insulation. Our seals protect the vehicle against water and dust.

- Products Family: **Glass Seals**

TECHNICAL FEATURES

- Seals can be stylized to incorporate chrome parts.
- Available in a wide range of complex shapes thanks to our 2K injection process.
- Can withstand severe conditions.

BENEFITS

- Lightweight
- Comfort

- Customizable
- Durability

MARKET AND EXPERTISE

AUTOMOTIVE & TRUCKS

Body Sealing Systems

ALL PRODUCTS FAMILIES

All Products Families for Automotive Body Sealing Systems

Glass Encapsulations

Our solutions can incorporate glass, gaskets and a division bar in a single part. In addition to being lightweight and easy to install, they guarantee a high level of acoustic insulation and a watertight seal.

Glass Seals

Our glass seals provide solutions for acoustic insulation, protection of the vehicle against water and dust and glass guidance. These lightweight and high-end parts can be completed with aluminum or stainless steel finishers.

Door, Trunk and Hood Seals

Our Door, Trunk and Hood Seals provide solutions for acoustic insulation, protection of the vehicle against water, air and dust and facilitate the door closing. They're light, recyclable and are available in a variety of finishes.
